

Low Carbon Eco-Innovatory

18th May 2017

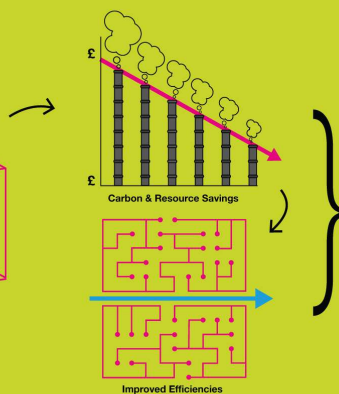

Low Carbon Eco-Innovatory

Core Offers

New & Innovative Products
(Design & Testing)

Chemicals

Manufacturing

Maritime

Environmental Science

Electronics

Engineering

Built Environment

Food & Beverage

Carbon savings are not limited by sector or subject. For a true low carbon future every sector and supply chain needs to reduce carbon emissions, and we are uniquely positioned to help.

Low Carbon Eco-Innovatory

Tailored Support

1st STEP

SCOPING

An initial exploratory meeting with the LCEI team determines the extent and level of support required for your business.

2nd STEP

ACTIVITIES

A bespoke action plan will be developed by your business and the LCEI team. The aim is to use all available resources and technologies to increase long-term profitability and set your company on the right track to a low carbon future.

3rd STEP

IMPLEMENTATION

The Action Plan will be implemented with the help of the LCEI researchers, academic staff, students and graduates. They will assist with every step of the agreed Action Plan, implementing new or improved technologies, processes or wider research as well as applying for specialist funding or investment where necessary.

4th STEP

MONITORING

The results of any greenhouse gas reduction and business improvement made by the LCEI team will be monitored to determine success.

Project Outcomes

143 Low Carbon research & innovation projects

20 PhDs

7 Masters by Research

48 Internships

29 Dissertation Projects

All contributing to an overall Greenhouse Gas reduction of **1600** TONNES

European Union
European Regional Development Fund

Low Carbon Eco-Innovatory

Eligibility....

**SME in the Liverpool City Region
(Halton, St Helens, Knowsley,
Sefton, Liverpool and Wirral)**
